

Create your own Space Alien!

We are currently learning about our Solar System and universe, but there is still a lot to learn. In fact, looking into our universe is one big mystery. What's out there? Are there any life forms?

Well, you have just made a spectacular new discovery that is going to answer one of these questions.

You have just discovered a new alien life form from outer space.

In the space below, draw and colour your alien life form. Your alien life form needs to meet the following criteria:

- 1) Be **CREATIVELY** and **NEATLY** drawn and coloured.
- 2) Cannot closely resemble a human. For example, I don't want to see 2 eyes or ears, 2 hands or feet.
- 3) Your alien can be friendly or devastating. It may come in peace, or may come to attempt world (Earth) domination. It may even come to just snack on our blood supply.
- 4) Remember, it's an alien, so anything works.
